Lighting and projection to music systems, we cater for all.

Installation

Professional team of installers for AV projects.
No matter what we get the job done and on budget.

Service

When you need a solution quickly, we are there for you.
Onsite support for AV systems is our speciality.

Case study

Revolucion De Cuba Belfast

Centrally located on bustling Arthur Street, Revolución de Cuba brings the spirit of Havana to the heart of Belfast.

A custom install was provided to produce a unique daytime dining experience through to live music and DJ led entertainment at night.

All audio visual equipment was designed, programmed and installed by Pro Technical to provide a complimentary atmosphere whatever the time.

Using JBL speakers, Crown amplification and BSS processing we were able to overcome the challenges in this large venue to provide a high quality audio experience.

Lighting was designed to be sympathetic to the surroundings and to enhance the mood from early doors, changing to more upbeat as the party gets into full swing.

Services

We provide integrated sound, light and video systems for the UK and Europe. For retail, leisure and anywhere high performance professional equipment is required. Seamlessly utilising the latest technology to bring the most innovative AV projects to life.
